## HEADPHONE PROCESSOR HP - 1 Mk3

The Pawel Acoustics Headphone Processor enables the user by means of headphones, the known spatial auditory sensation comparable to a high-quality loudspeaker reproduction.

The typical in-head localization effect with headphones is omitted, and the reproduction of the sound source will appear in the right place and at the right size ratio.

A sophisticated circuit design together with first-class and selected components according to audiophile criteria's provide an excellent sound quality.

The processor is available for the following STAX headphones:

SR - 207 / 307 / 407 / 507

SR - 4070

SR - 007 Mk2

SR - 009 in works

Versions for other headphone models are available on request.
